To Whom It May Concern:

Our company has had nine (9) Badgewarehouse Release Programs established for our clients with The Imagery Group, Nashville, TN. These programs have efficiently and effectively meet the badge needs of these clients and it has helped our company operation because of the following:

- A. It is an extremely user friendly badge stocking and release program. It is difficult for the user to foul up the order release process.
- B. All we have to do is initially set up the program and monitor the shipping. Our clients do the balance of the work which frees up our time to do other sales growth activities. It is really hassle free to us.
- C. Our profitability is increased through sales of large badge quantity orders requiring minimal additional maintenance on our part
- D. The 24/7 access feature has been very helpful to us. Remote, weekend entry into client programs has allowed us to utilize our time efficiently.
- E. There are no fees to drop ship orders to client defined changed shipping locations.
- F. There are no minimum order quantity restrictions which has been a strong selling point for the badge release program.

We are happy to recommend The Imagery Group Badgewarehouse Release Program based upon our operational experiences with it.

Yours truly,  
(Signature Authorized)
